Omernick's Level III Ecoregions

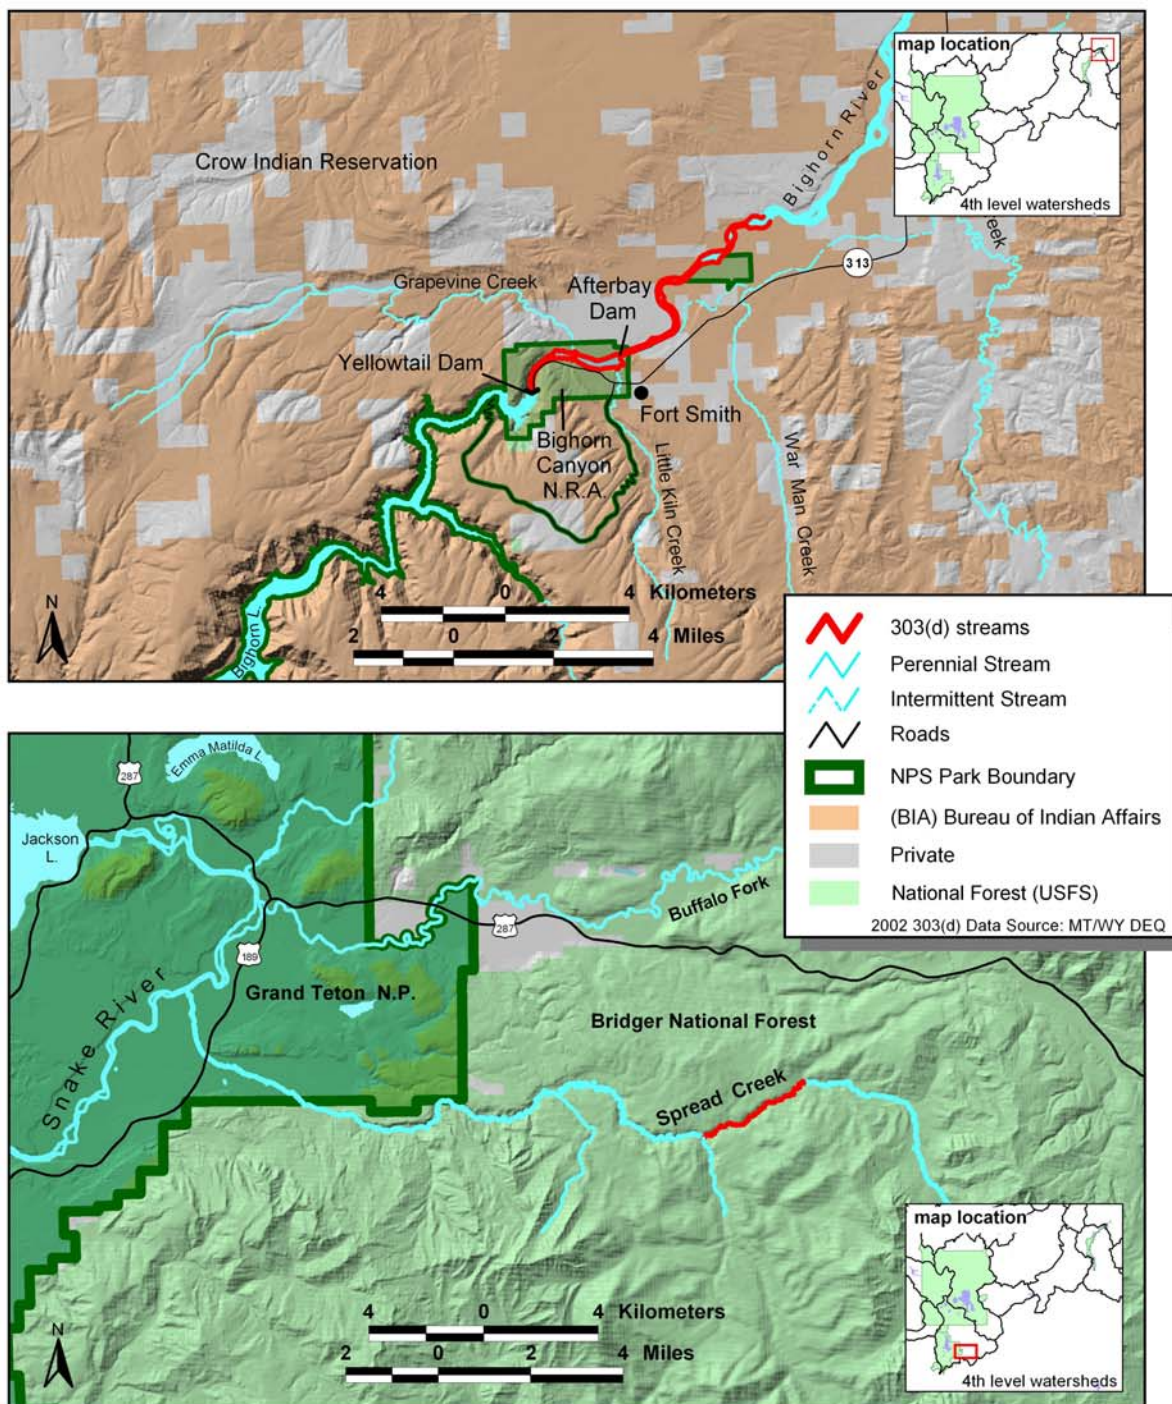

Ecological Units

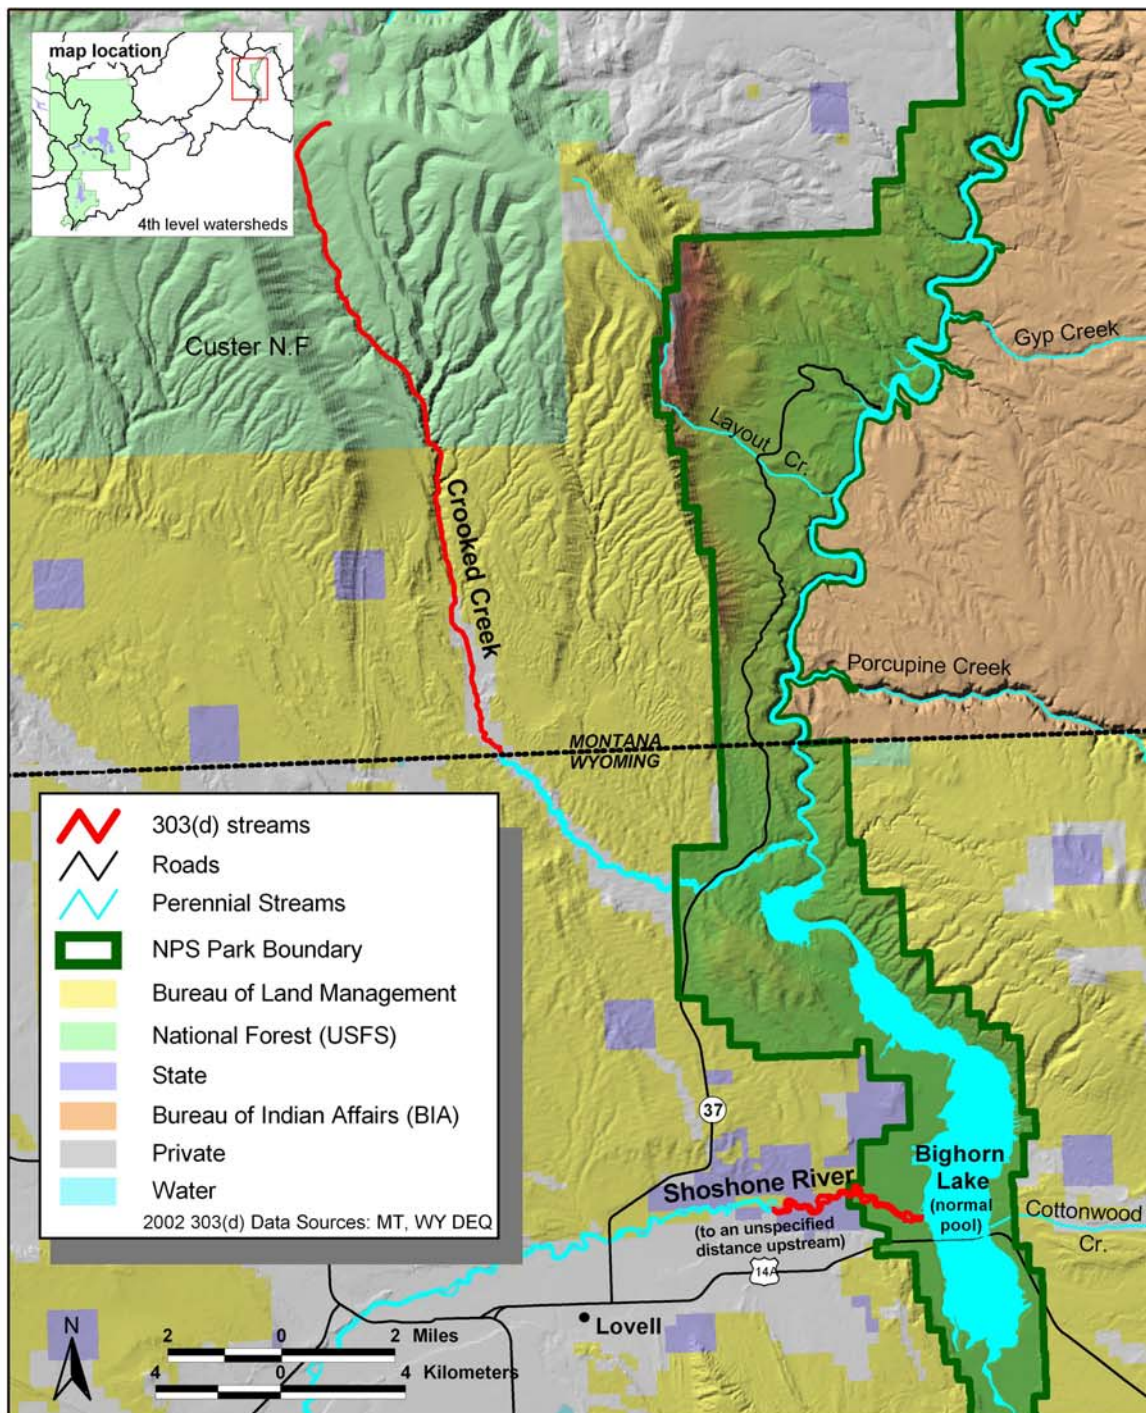

The map illustrates the Snake River watershed, a major water source for the western United States. The Snake River is shown flowing from the south (Idaho) towards the north (Montana). Key tributaries include the Yellowstone River (flowing from the west), Shoshone River (flowing from the east), Bighorn River (flowing from the east), Crooked Creek, Soda Butte Creek, Reese Creek, and Spread Creek. The map also shows the locations of several National Parks and National Forests, including Yellowstone National Park, Grand Teton National Park, Gallatin National Forest, Upper Yellowstone National Forest, Stillwater National Forest, Clarks Fork Yellowstone National Forest, Pryor National Forest, Lower Bighorn National Forest, and Little Bighorn National Forest. Major cities and towns are marked, such as Bozeman, Livingston, Billings, Cody, and Jackson. The map includes a scale bar in kilometers and miles, and a north arrow.

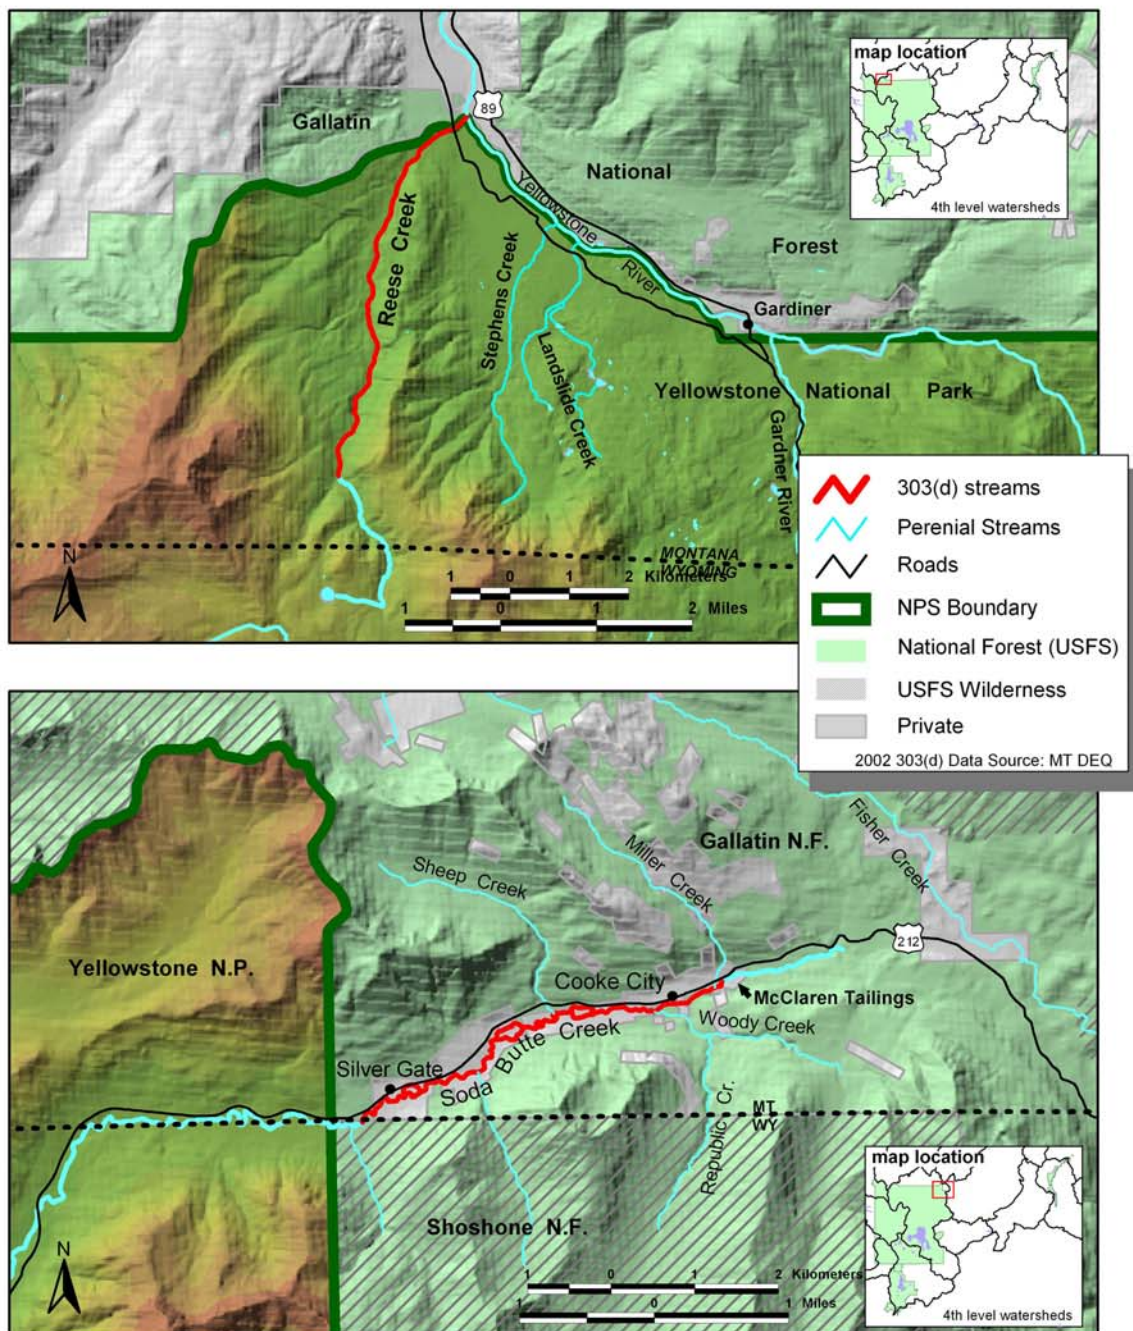

State of Montana and Wyoming 303(d) Impaired Waters Bighorn Canyon N.R.A. and Grand Teton N.P.
